

A Friendly Community Reminder

The 2019 residential burn season has officially ended as of April 30th. Please refrain from burning your brush piles until further notice. The only exceptions are for agricultural burn permit holders. Big Sur Fire kindly asks that you continue working to improve your defensible space and creating your own fire resistive landscapes.

Looking ahead, Big Sur Fire is working towards implementation of a community chipping program to help process your branches and brush cuttings even after the burn season has ended. In anticipation of this new service, please place your branches with all of the cut ends facing the same direction towards your road for access or at least in an area accessible by vehicles. For more information, please email info@bigsurfire.org or call (831)667-2113.
