## Incident Information:

Start / Report Date: Aug. 18, 2020

Cause: Unknown

Fuels Involved: Chaparral, Brush,  
Timber understory

Size: 20,213

Location: Hwy 1(MM32.20) N of  
Limekiln State Park, 10 miles S of  
Big Sur

Containment: 15%

Injuries: 0

## Resources:

Hand Crews: 11

Engines: 46

Dozers: 7

Helicopters: 4

Fixed wing: 1

Water Tenders: 7

Total Personnel: 662

## Current Situation:

Fire behavior overnight was moderated due to the marine layer. Night operations focused on monitoring fire conditions and gathering information about the fire that will assist today's fire operations.

Today crews will continue to focus on the Northern and Southern edges of the fire by constructing and enhancing contingency lines. These control lines will provide additional protection and management options for firefighters in the event that fire progresses towards the structures. Additional dozer lines are being scouted and constructed to provide point protection for communities. Crews will also be monitoring bridges that may serve as pathways for fire to cross into unburned areas. The hazards of rolling rocks and spot fires in the field, as well as driving and traffic conditions on the road continue to be safety concerns for crews.

Low intensity backing fires are expected again today in Julia Pfeiffer Burns State Park and crews will be in the park providing structure protection. Firefighters will monitor the Eastern perimeter near the North Coast Ridge Road at the transition of the North Coast Ridge trail where the fire was active yesterday. Fire behavior and growth in that area is driven largely by fuels with no recent fire history.

The fire is threatening the communities of Hermitage, Partington Ridge, and Lucia. Multiple businesses, communications sites, parks and recreational sites are also threatened. Among natural resources threatened are the Ventana Wilderness and coastal watershed and habitat for threatened and endangered species, including the California condor.

Fire activity in the western United States has caused a high demand for fire personnel and equipment. The nation is in Preparedness Level 5 (PL5), the highest level. In PL5 over 80% of the nation's incident management teams and wildland firefighting personnel are committed to incidents. Currently there are 93 large uncontained fires nationwide with nearly 28,000 firefighters. To date, fires have burned 2.1 million acres with 1.84 million acres burned in California alone. Resource orders are being prioritized to fires across California and the west. Acreage reported here is an estimate and will be updated when IR images are available.

**Carmel Fire Info:** <https://www.fire.ca.gov/incidents/2020/8/18/carmel-fire/>

**River Fire Info:** <https://www.fire.ca.gov/incidents/2020/8/16/river-fire/>

**Updates and Meetings:** Fire Information is producing two daily written updates. To request an update, email [2020.dolan@firenet.gov](mailto:2020.dolan@firenet.gov) and provide your email address. A daily video update will be posted to the Los Padres National Forest Facebook page and Inciweb (See links in header).

**Weather:** Tomorrow's weather is expected to be typical for late summer days with a marine layer and inversion lifting to clear skies.

**Evacuations / Closures:** Click [here](#) for an interactive map of Monterey County evacuations.

**Smoke:** The Monterey Bay Air Resources District has issued a Wildfire Air Quality Advisory. When the concentration of smoke has reached UNHEALTHY levels of the AQI, residents should limit their activity by staying indoors with the doors and windows closed to avoid breathing smoke. Updates on the current air quality forecast and Air Monitoring data can be found at <http://air.mbard.org/>.

**Alert Monterey County:** To receive emergency notifications regarding evacuations and critical events in Monterey County please sign up for A!ert Monterey County at the following website:  
<https://member.everbridge.net/453003085611217/login>.

**Cooperating and Assisting Organizations:** National Weather Service, California Highway Patrol, Monterey County Sheriff's Department, Big Sur Volunteers, Cal Trans, California State Parks, OES, Ventana Wilderness Alliance

**Safety Message:** This will be a long duration event. Residents in the affected area are encouraged to continue to prepare for the possibility of fire in their area in advance. Go to <https://www.ready.gov/wildfires> to learn how to prepare.
